Professional Summary

Fresh Information Systems graduate with practical experience building AI and data-driven applications. Skilled in Python, SQL, data analysis, machine learning fundamentals, and RAG-based systems. Interested in joining Dal Professional Accelerator to gain real-world experience, work with professional teams, and contribute to meaningful AI and data projects.

Core Skills

- **Programming:** Python, SQL, JavaScript
- **Data Analysis:** Pandas, NumPy, data cleaning, data preprocessing, exploratory data analysis
- **Machine Learning:** scikit-learn, model training, model evaluation, classification basics
- **AI Applications:** RAG, embeddings, prompt engineering, Hugging Face, LangChain
- **Backend & Tools:** FastAPI, Git, Docker, PostgreSQL, MySQL
- **Soft Skills:** problem solving, self-learning, teamwork, communication, documentation

Main Project

ChatUB — Academic AI Assistant

Graduation / Academic AI Project

Built an academic AI assistant designed to help students get answers from academic information and university-related sources using a retrieval-based approach.

- Developed a RAG-based academic assistant that retrieves relevant academic content before generating answers.
- Prepared and structured academic data to improve answer relevance and reduce unsupported responses.
- Implemented the backend application flow using Python and FastAPI.
- Used embeddings and retrieval logic to connect user questions with the most relevant source content.
- Focused on Arabic-friendly user experience and practical student support use cases.
- Improved understanding of applied AI systems, data preparation, retrieval quality, and AI product thinking.

Tools: Python, FastAPI, RAG, embeddings, structured data, Git

Education

Bachelor's Degree in Information Systems

University of Bisha | 2022 – 2026 | GPA: 4.01 / 5

Training Motivation

I am applying to Dal Professional Accelerator to strengthen my practical skills in AI and data science, learn how professional teams build real-world solutions, and apply my technical foundation in a structured work environment. I am especially interested in improving my ability to work with data, build useful AI applications, and communicate technical ideas clearly.
