

Abdulelah Alkhathami

Information Systems Graduate | AI & Data Science Trainee

Location: Saudi Arabia | Email: me@abdulelah.de

GitHub: <https://github.com/Abdulel3h> | Portfolio: <https://abdulelah.de>

Professional Summary

Fresh Information Systems graduate with hands-on experience in AI, data science, and applied software projects. Skilled in Python, SQL, data analysis, machine learning basics, RAG-based applications, and building simple AI-enabled systems. Seeking practical training through the Dal Professional Accelerator to strengthen real-world experience and contribute to AI and data projects.

Technical Skills

- **Programming:** Python, SQL, JavaScript
- **Data & ML:** Pandas, NumPy, scikit-learn, Matplotlib, data preprocessing, model evaluation
- **AI Applications:** RAG, embeddings, AI agents, Hugging Face, LangChain
- **Backend & Tools:** FastAPI, Git, Docker, PostgreSQL
- **Cloud & Databases:** Supabase, Google Cloud basics, MySQL

Projects

ChatUB — Academic AI Assistant

- Built a RAG-based academic assistant to answer student questions using academic sources and university regulations.
- Prepared structured data, designed retrieval logic, and connected AI responses to a simple application flow.
- Used Python, FastAPI, embeddings, and Git to build a practical AI solution focused on reliable answers.

Healthcare Risk Prediction

- Developed a machine learning project to analyze health-related data and predict potential risk patterns.
- Applied data preprocessing, feature handling, model training, and evaluation using Python and scikit-learn.
- Strengthened understanding of supervised learning, data quality, and model performance.

AI Agents & Automation Experiments

- Built practical experiments using AI agents and workflow automation to connect AI models with task logic.
- Explored how AI can support decision-making, information retrieval, and process automation.
- Used tools such as Python, FastAPI, LangChain, and automation workflows.

Education

Bachelor's Degree in Information Systems

University of Bisha | 2022 – 2026

Training Motivation

I am applying to the Dal Professional Accelerator to gain deeper practical experience in AI and data science, learn from professional teams, and apply my technical skills in real-world projects.
